Volume 65, No. 2 | February 2019 | Business Meetings as Announced

En hilsen fra Nordahl Grieg Presidenten

Kjære Venner (Dear Friends),

The year is starting out strong. We had a delightful officer installation, and I managed to get an officers meeting scheduled so we could get the year all arranged. We are going to have some amazing socials, and our meeting schedule in 2019 will hopefully make it easier for more members to attend. For me, the first and almost most important social of the year is always the Anniversary Dinner. I look forward to seeing everyone on Saturday evening, February 23 for the 73rd Anniversary Dinner for Nordahl Grieg Lodge.

I'm planning to take what I learned in 2018 to make 2019 one of the best for our lodge. We still have a lot of room to grow and I look forward to seeing what the future brings to Nordahl Grieg. Please take the time to read all the wonderful information that is put together for you in the *Tidende*. **Vicki Everly** always does such an amazing job putting together our newsletter every month, which is a job I know I would never be able to undertake.

Also, to all the 2019 Nordahl Grieg Officers, *Tusen Takk* for volunteering to help "steer the ship" of our lodge for another year. Each of you bring something special to the table and I just hope that as your President I can make sure everyone's talents are used to make 2019 one of the best years for Nordahl Grieg Lodge.

Fraternally,

Laura Porter, President

Trailblazer Was Known for Preserving Svalbard's Nature

Norwegian botanist Hanna Resvoll-Holmsen (1873 –1943) is known for paving the way for women in both academia and polar research. Often working alone, Hanna would take expeditions to Svalbard to study the archipelago and its historic sites and fossils. She crossed glaciers, climbed mountains, and walked miles of shoreline to document arctic plants and fossils. Her efforts to preserve nature in Svalbard are why she is recognized as Norway's first nature and environmental conservationist.

Hanna was independent, resourceful, and passionate and she continuously pushed boundaries. She became the first woman to attain a doctoral degree in botany in Norway and the first female lecturer in phytogeography (the study of the geographical distribution of plants). She was also an accomplished photographer, and the first to capture Svalbard's plants in color.

Hanna was truly a pioneer for women of her time. As such, she was recently honored through art by Anne-Karin Furunes, displayed at the Fram Centre, Tromsø.

Oslo Plans To Go Carbon Neutral by 2030

Norway has plans to stop the sales of gas and diesel-fueled cars in the next four years, and the city of Oslo is working toward an ambitious goal of being carbon neutral by 2030. Here are a few of the initiatives currently underway in Oslo that will help the city meet this goal.

Since transportation makes up the largest part of the city's carbon footprint, Oslo is promoting electric cars by creating new "low-emissions zones" where only electric cars can drive. The city is also removing parking spaces to add 40 miles of bike lanes and providing grants for electric cargo bikes.

Businesses are also working diligently to support this initiative. Construction companies are purchasing new electric-powered equipment and will have to comply with a zero emissions standard for new building construction sites. A computer data center in Oslo pumps heat from servers into a heating system that heats approximately 5,000 apartments in the city. A newly built office space is encouraging their employees to go carbon neutral by including space for 500 bikes and 10 electric car charging stations.

If all goes according to plan, Oslo will be leading the way for other cities striving toward a carbon-neutral environment.

A Heartwarming, Sweet Treat

In Norway, heart-shaped *vafler* (waffles) are served for dessert or as a treat. Why not make them for your loved ones this Valentine's day or any time soon?

Ingredients
6 eggs
½ cup sugar
1 tsp. ground cardamom
1 ½ cup flour
1 tsp. baking powder
Pinch of salt
1 cup sour cream
½ cup melted butter
3 tbsp. butter for frying

Step 1: Mix eggs, sugar, and cardamom together in a big bowl.
Step 2: Add in flour, baking powder, and salt.
Step 3: Mix these ingredients and beat in sour cream and butter until the batter is smooth. Let the batter sit for about 20 minutes before you being making the waffles.
Step 4: Heat up the iron and brush some of the butter on the surface. You are now ready to make waffles.
Step 5: Pour 1/4 cup of the batter in the iron and wait for the waffle to become light brown.
Step 6: Take it out (watch out, it's hot!) and serve it warm.
Step 7: Top with jam, whipped cream, or sour cream. Try different toppings or make a waffle sandwich.

a little in English...

Researchers Find Large Amounts of Coins, Hairpins, and Pearls Under the Floors of Old Churches

Small treasures tell a dark story about Norway's medieval culture

Archaeologists have found more than 20,000 coins, beads, and hairpins under the floorboards of old Norwegian stave churches. A total of 10,286 of the coins are from between 1180 and 1320 A.D. In the Middle Ages, there were likely thousands of stave churches in Norway. Today, 28 stave churches remain standing. In addition, Norway probably has a few hundred other churches with roots in the Middle Ages. The coin findings in these churches reveal how widely coins were being used in Norwegian settlements 800 years ago.

One gender on either side

In the Middle Ages people stood during church. Only the old and infirm got to sit on benches along the sides. Presumably there was also a clear division between the sexes. Women stood on the north side of the sanctuary and men on the south side.

"When we investigated where in the church rooms hairpins, beads, and other objects associated with women were located under the floorboards, we found that more than 95 percent were below the north side of the sanctuary," says Svein Harald Gullbekk, an archaeology researcher at the University of Oslo.

Thus, Gullbekk confirmed the strict division of medieval churches, where women had to stand on the side that people connected with the dark and cold forces in nature. The men stood on the south side.

litt på norsk...

Forskere har funnet store mengder mynter, nåler og perler under gulvet i gamle kirker

De små skattene forteller en mørk historie om middelalder-kulturen i Norge

Arkeologer har funnet flere enn 20 000 mynter, perler og nåler under gulvet i de gamle norske stavkirkene. Hele 10 286 av myntene er fra årene 1180 til 1320. I middelalderen fantes det antakelig over tusen stavkirker i Norge. I dag er 28 stavkirker bevart. I tillegg har Norge antakelig et par hundre andre kirker med røtter i middelalderen. Myntfunnene i kirkene avslører hvor utbredt mynter var på bygda i Norge allerede 800 år tilbake.

Kjønnene på hver sin side

I middelalderen sto folk oppreist i kirken. Bare gamle og syke fikk plass på benker langs sidene.Antakelig var det også en klar en inndeling mellom kjønnene. Kvinner på nordsiden av kirkerommet og menn på sørsiden.

– Da vi undersøkte hvor i kirkerommene det var funnet nåler, perler og andre kvinnerelaterte gjenstander under gulvet, så fant vi at mer enn 95 prosent lå under nordsiden av kirkeskipet, sier Svein Harald Gullbekk, forsker i arkeologi ved Universitet i Oslo.

Slik fikk Gullbekk til fulle bekreftet den strenge inndelingen i middelalderkirkene, der kvinnene måtte stå på den siden folk forbandt med de mørke og kalde kreftene i naturen. Mennene hadde plass på sørsiden.
